EDUCATION

Alabama A&M University

B.S. in Computer Science | GPA: **4.0/4.0** | Transfer Merit Scholar

Expected Dec 2026

Huntsville, AL

Jacksonville State University

B.S. in Computer Science, Data Science Concentration | GPA: **4.0/4.0** | Prestige Scholar

Aug 2022 – Dec 2023

Jacksonville, AL

EXPERIENCE

Microsoft

May 2026 – Jul 2026

Software Engineer Intern

Redmond, WA

- Built the **C#/.NET backend** for a **Microsoft 365 Copilot AI Expense Agent** connecting two enterprise financial systems into a unified real-time budget dashboard, cutting manager expense review time by **over 80%** each quarter.
- Added **conversational budget allocation** using Microsoft Graph org data, enabling managers to split team budgets by region through natural language; built a **scalable Excel export** with server-side generation and OneDrive delivery.
- Diagnosed and fixed a Copilot rendering bug and a backend concurrency issue in parallel org-data fetching; added caching, batching, and retry logic for reliability across large organizational hierarchies.

Amazon

Jan 2026 – Apr 2026

Software Development Engineer Intern

New York, NY

- Architected and shipped an end-to-end **Slack Launch Announcement** feature for Arc on a serverless AWS stack (React.js, Lambda/TypeScript, API Gateway, DynamoDB, S3, CDK), closing a **70% coverage gap** and saving **5–8 hours per manager per quarter**.
- Solved complex Slack media embedding to support inline assets in announcements; engineered a full create, edit, and soft-delete lifecycle ensuring a complete, production-ready announcement workflow.
- Independently delivered **2 stretch goals** before deadline: a one-click **AI case study generator** powered by Amazon Bedrock that auto-drafts campaign summaries, and a database query optimization eliminating full-table scans for faster link retrieval.

WGI

Sep 2025 – Dec 2025

Geospatial Software Engineering Intern

Huntsville, AL

- Fine-tuned a **YOLOv8 billboard detection model** on a custom Roboflow dataset and deployed it into WGI's production ODA image processing pipeline, automating billboard identification across field imagery.
- Reverse-engineered a legacy **C# codebase**, mapping function-call graphs and database schema to directly enable WGI's migration to a Python-based ArcGIS toolbox pipeline.

Amazon

May 2025 – Jul 2025

Software Development Engineer Intern

New York, NY

- Built the **Clone Deal Feature** end-to-end (Coral backend, React/Redux frontend), cutting deal setup time by **~80%** for sales teams handling **150+ deals/day**.
- Designed a cross-service API auto-populating fields across legacy systems; authored HLD/LLD, led design reviews, navigated Brazil Package Manager and CI/CD, and shipped with full test coverage on schedule.

PROJECTS

FICO Credit Card Fraud Detection | Python, TensorFlow, scikit-learn, pandas, geopy

2025

- Engineered **10 fraud-signal features** on **1.6M transactions**; trained a neural network (Dropout 30%, L2, early stopping) achieving **AUC 0.92 / LAUC 0.796** on a blind holdout, intercepting **75.6% of fraud losses** by reviewing just **0.5%** of legitimate transactions with no evidence of overfitting.

Uplift Biz | Next.js, Firebase, Gemini AI | *Top 10 of 200+ teams, HBCU App Build & Pitch*

2025

- Built a full-stack AI counseling platform with Gemini-powered business recommendations, personalized financial dashboards, and real-time data sync via Firebase Auth and Firestore.

SKILLS & RECOGNITION

Languages & Frameworks: Python, TypeScript, JavaScript, Java, C#, C++ | React, Redux, Next.js, Spring Boot, FastAPI

Cloud & Infrastructure: AWS (Lambda, API Gateway, DynamoDB, S3, CDK, Bedrock, Secrets Manager), Azure (App Service, Entra ID, Microsoft Graph)

Tools & Databases: Git, SQL, Node.js, REST APIs

Recognition: Meta Scholar 2024 | Goldman Sachs VCI | Bloomberg Accelerator | PFX2025 Research Mentor | CodePath Advanced TIP | Mastercard Data Challenge Finalist | HBCU App Build & Pitch (**Top 10 of 200+ teams**)

Organizations: President, IEEE @ JSU | President, Nepalese Student Organization @ JSU | Secretary, IEEE @ AAMU | Google Developer Student Club | ColorStack
